

# THE #REDBALL IS BACK PRIMAL™ RAGE EVOLUTION

## MEDIUM OIL

The game's evolved. If you want to stay on top, you need the right tools to dominate. That's where the Primal Rage Evolution comes in—it's not just an upgrade; it's a whole new level of power. The original Primal Rage was a game-changer, a ball that made heads turn and put MOTIV on the map. We're talking about the #redball, the one that Bowling This Month called the most angular ball ever made. Now, over a decade later, the legend is back and it's ready to reclaim the crown. This medium oil beast offers unbelievable speed and power downlane.

## IMPULSE™ V2 WEIGHT BLOCK

The dual-density, high-RG Impulse V2 core creates insane energy retention, giving you explosive power down-lane. This core delivers heat when it matters most.

15# RG: 2.55 | 15# Diff: .050 | Flare: 5"+

## PROPULSION™ FYJ PEARL REACTIVE

Recently introduced on the Raptor Rush, the Propulsion FYJ (Fifteen Year Journey) pearl cover is the pinnacle of fifteen years of pearl research and development. This is the strongest, most angular shell we've ever created - delivering a combination of strength and angularity that's nothing short of extraordinary. Combined with the Impulse V2 core, the Primal Rage Evolution delivers power and angularity at astounding levels. This isn't just a bowling ball. It's a statement.

## 5500 GRIT LSP FINISH

A mirror-like 5500 Grit LSS finish provides the length needed through the front of the lane, storing energy for an explosive backend reaction.
